ALFA RIZI

JAVA BACKEND DEVELOPER

West Bandung, West Java, Indonesia | alfarizi.developer@gmail.com | github.com/a1fariz | alfarizi.my.id | LinkedIn

PROFESSIONAL SUMMARY

Backend Developer specializing in Java microservices, enterprise modular monoliths, concurrent database design, and robust asynchronous pipelines. Extensive hands-on experience with Quarkus 3.15 LTS, Spring Boot 3.2, and Spring Cloud Gateway, backed by deep PostgreSQL mastery (PL/pgSQL triggers, views, Flyway migrations, pessimistic row locking). Proficient in double-entry escrow accounting, Redis caching, Python FastAPI, Docker, and GitHub Actions CI/CD.

TECHNICAL SKILLS

Languages:	Java 17, Python 3.12, SQL, JavaScript (Node.js), C
Frameworks & Architectures:	Quarkus 3.15 LTS, Spring Boot 3.2, Spring Cloud Gateway, Spring Security 6, FastAPI, Express.js
Databases & Persistence:	PostgreSQL, Redis 7, PL/pgSQL (Triggers, Views, Functions), Flyway, Drizzle ORM, Hibernate, ChromaDB
Security & Systems Logic:	Double-Entry Accounting Ledger, Pessimistic Row Locking, JWT (Rotation), RBAC, BCrypt, Rate Limiting
DevOps & Testing:	Docker, Docker Compose, GitHub Actions (CI/CD), ArchUnit, Testcontainers, JUnit 5, Postman, Linux CLI, IntelliJ IDEA
Go & Mobile Development:	Go (Golang), Dart, Flutter, net/http, pgx, PostgreSQL, SQLite (sqflite)

FEATURED BACKEND PROJECTS

Catat Uang - Personal Finance Application | *Go, Dart, Flutter, PostgreSQL, SQLite* 2026

- Developed an offline-capable Flutter app with transactions, bills, SQLite storage, and local reminders.
- Built a Go REST API with PostgreSQL, registration/login, revocable sessions, transaction/bill CRUD, and idempotent payments.
- Implemented opt-in transaction/bill sync with SQLite outboxes, idempotent retries, conflict review, encrypted backups and account recovery; backend/Android CI passed.

ReLoop — Enterprise Circular-Commerce Backend & Escrow Engine | *Java 17, Quarkus 3.15 LTS, PostgreSQL 16, Redis 7, Flyway* 2026

Demo: https://reloop.biz.id | Code: github.com/a1fariz/ReLoop

- Architected an enterprise modular monolith on Quarkus 3.15 LTS across 25 bounded contexts with ArchUnit boundary verification.
- Engineered balanced double-entry escrow accounting (DR=CR) for platform commissions, seller payouts, and arbitrated disputes.
- Implemented anti-hoarding checkout leases using pessimistic row locking (SELECT ... FOR UPDATE) and PostgreSQL partial unique index.
- Built an asynchronous transactional outbox dispatcher (FOR UPDATE SKIP LOCKED) and Redis catalog cache layer.

ApexGrid — F1 Race Ticket Booking Microservices Backend | *Java 17, Spring Boot 3.2, Spring Cloud Gateway, PostgreSQL, Docker* 2026

Code: github.com/a1fariz/ApexGrid

- Engineered a distributed 3-service backend (API Gateway, User Service, Race Service) with Spring Cloud Gateway and JWT RBAC filters.
- Guaranteed zero quota race conditions via PostgreSQL PL/pgSQL triggers and automated 30-minute booking cancellation workers.
- Implemented automated PDF ticket generation with embedded QR codes (ZXing & iText) and asynchronous email notification dispatch.

StudyMate AI — Asynchronous RAG Backend Engine | *Python 3.12, FastAPI, ChromaDB, Sentence-Transformers, PyMuPDF* 2026

Code: github.com/a1fariz/StudyMateAI

- Designed an asynchronous textbook parsing API using FastAPI, PyMuPDF citation extraction, and LangChain splitters.
- Implemented semantic vector similarity search via ChromaDB embeddings and connected Google Gemini 2.0 Flash for grounded content.
- Built token-bucket rate limiting (60 req/min) and configured GitHub Actions CI/CD workflows executing Ruff and Pytest async suites.

Finance Management System (FinanceAll) — Spring Boot MVC | *Java 17, Spring Boot 3.2, Spring Security, PostgreSQL, Flyway* 2026

Code: github.com/a1fariz/financeall_project_java_alfariz

- Engineered a personal finance application using Spring Boot 3.2, Spring Data JPA, and Flyway version-controlled migrations.
- Configured Spring Security 6 session authentication, BCrypt encryption, and financial calculation engines (4% Rule, debt payoff).

PROFESSIONAL EXPERIENCE

Lead Intern — IT & Business Operations 2025 – Sep 2026

PT Resika Cemerlang (Pasim Group) *Bandung, Indonesia*

- Directed a 5-person intern team managing day-to-day IT support operations, hardware diagnostics, and workstation SLA ticket compliance.
- Enforced OS security patching, software configurations, and antivirus definition updates across corporate laptops.
- Validated technical specifications across thousands of medical device asset entries, ensuring database integrity and audit readiness.

EDUCATION & TRAINING

Universitas Nasional PASIM Coursework completed; preparing for final thesis defense

Associate Degree in Informatics Management (D3) — GPA: 3.78 / 4.00 *Bandung, Indonesia*

- PUB Intensive Technical Scholarship (2024 – Present): Logic & C, Data Structures, Relational Databases, Advanced Java Development, and React Development.
- Intensive React Front-End Development Training (Sep 2026); Fundamental Back-End Programming with Java and Git & GitHub Training (Jan 2026).
- Web Programming Training (Aug 2025); Database and Data Structure Training (May 2025).

CERTIFICATIONS & CREDENTIALS

Python for Everybody Specialization — University of Michigan (2026)

Certified Entry-Level Python Programmer (PCEP) — Python Institute (2025)

Programming for Data Science with Python — HarvardX (2025)

Introduction to Cloud Computing — IBM (2026)
