

# ALFA RIZI

UNDEFINED

West Bandung, West Java, Indonesia | [alfarizi.developer@gmail.com](mailto:alfarizi.developer@gmail.com) | [github.com/a1fariz](https://github.com/a1fariz) | [alfarizi.my.id](https://alfarizi.my.id)

## PROFESSIONAL SUMMARY

Full-Stack Developer experienced shipping complete web products — React 18/19 and Next.js frontends paired with Spring Boot 3, FastAPI, and Node.js/Express backends on PostgreSQL. Adept at designing secure REST APIs, relational database schemas, and responsive user interfaces within Docker-based CI/CD workflows.

## TECHNICAL SKILLS

|                       |                                                                                                              |
|-----------------------|--------------------------------------------------------------------------------------------------------------|
| Frontend Development: | TypeScript, JavaScript (ES6+), React 18/19, Next.js 16 (App Router), HTML5, CSS3, Tailwind CSS, Recharts     |
| Backend Engineering:  | Java 17 (Spring Boot 3.2, Spring Cloud Gateway, Spring Security), Python 3.12 (FastAPI), Node.js, Express.js |
| Databases & ORM:      | PostgreSQL, PL/pgSQL Triggers & Views, Drizzle ORM, Spring Data JPA, ChromaDB, SQLite                        |
| Security & Auth:      | JWT Authentication, Firebase Auth, RBAC, BCrypt, Rate Limiting, CORS                                         |
| DevOps & Tooling:     | Docker, Docker Compose, GitHub Actions (CI/CD), Git, Maven, Vite, esbuild, Postman                           |

## FEATURED FULL-STACK PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |      |
